I would like to reproduce the kind of graphs used in the book *Deep learning*. Do you know the tool which can do that kind of graphs? Ideally I would like the apparence to be exactly the same.

Here is an example of Recurrent neural network graph:

x $x^{(t-1)}$ $x^{(t)}$ $x^{(t+1)}$

graphical-model

yed is a very convenient tool for drawing graphs, but I'm not aware that it's able to do math mode.

2

Not really convenient, but very powerful, is the tikz package from Latex.
